Melinda Kellogg
Fall 2006 Student Evaluation Comments

ASTR 101-01:

I really enjoyed this class, I would have liked it better if it wasn't at 8:00

She was awesome. Everything was straight to the point, she worked really hard to understand our questions and make sure we knew the subject matter. The power points were effective and easy to understand. Everything she said reinforced what we learned from the reading. I really enjoyed this course.

This was a very interesting class. It was a little hard, but was well-taught!

ASTR 111-01:

I liked this class but I would have liked to go outside more.

This was a lab so there was not a lot of lectures going on. She really took the time to answer everyone's questions, she was very patient with everyone. She explains things well so anyone can understand without giving away answers.

Comments:

One of my favorites this semester. The class was interesting and I would recommend it to others.

This class is extremely difficult. Dr. Kellogg did a great job helping us to understand.

Dr. Kellogg is a great professor! Even if I don't understand 100% completely she makes learning exciting and does a great job of helping with any questions.

Comments

1. The homework felt over bearing. I'm uncertain if I'm the only student who had trouble finishing the homework or not, but even when I gave a great effort on a subject that I felt I understood, the homework took several hours to complete.
2. Taught with enthusiasm and gave great examples/demonstrations that made the class an enjoyable experience.
3. I have never had a physics course before this one, however, Dr. Kellogg was more than proficient in explaining everything in a way I could understand. Dr. Kellogg is an excellent teacher.
4. Dr. Kellogg is an excellent professor and is very prepared. She is understanding when something arises. The speed of the course is intense, and would prefer to slow down, but also understand the time constraints. The homework is at a much higher difficulty than the tests and is not always clear.
